BİZ KİMİZ ?

## HAKKIMIZDA

2013 yılında, membran kapakla başlayan serüvenimiz ileriki yıllarda lake kapak, membran kapak, lake kapı, membran kapı, duvar paneli ve süpürgelikle devam etmiştir.

Yıllar içinde deneyimlerimizi ve teknolojiyi bir araya getirerek, kalite anlayışıyla müşteri memnuniyeti hedeflenmiştir. Kalite standartlarıyla birlikte klasik ve yeni çizgileri bir araya getirerek, evlerimizi yuvaya dönüştürmek için gayret içerisinde olup, farklı alternatiflerle yanınızda olacağız.

## MİSYONUMUZ

Markamız müşterilerine en kaliteli ürünleri ve hizmeti sunarak sürdürülebilirlik, şeffaflık ve müşteri memnuniyeti ilkeleri doğrultusunda, müşterilerimizin hayatını güzelleştirmeyi görev olarak kabul edecektir. Bu değerler ışığında ergonomi ve kaliteye verdiğimiz hassasiyet ile müşterilerimiz memnuniyetinin yanında topluma ve çevreye saygılı bir şekilde hareket etmek için, her geçen gün daha fazla çaba sarfetmekteyiz.

## VİZYONUMUZ

Kalite ve estetiği ergonomik tasarımlarla birleştirerek uzman kadro, pazarlama, satış, üretim ve sevkiyat ile bütünlük sağlayan bir marka yaratmak.

# LAKE RENKLER

\*\*\* Katalogtaki modellerimizin tamamına lake renklerimizi uygulamaktayız.

## Page 45

The first two steps are the most important. The first step is to identify the problem. The second step is to define the problem. The third step is to identify the causes of the problem. The fourth step is to identify the effects of the problem. The fifth step is to identify the stakeholders involved in the problem. The sixth step is to identify the resources available to solve the problem. The seventh step is to identify the constraints on the problem. The eighth step is to identify the risks associated with the problem. The ninth step is to identify the opportunities associated with the problem. The tenth step is to identify the solutions to the problem. The eleventh step is to identify the implementation of the solutions. The twelfth step is to identify the evaluation of the solutions. The thirteenth step is to identify the monitoring of the solutions. The fourteenth step is to identify the reporting of the solutions. The fifteenth step is to identify the communication of the solutions. The sixteenth step is to identify the documentation of the solutions. The seventeenth step is to identify the archiving of the solutions. The eighteenth step is to identify the disposal of the solutions. The nineteenth step is to identify the recycling of the solutions. The twentieth step is to identify the reuse of the solutions.

|  |
|--|
|  |
|--|

The first step in the process of identifying a problem is to recognize that a problem exists. This is often done by comparing current performance with a desired state or goal. Once a problem is identified, the next step is to define the problem more precisely. This involves determining the scope of the problem, the resources available, and the constraints that may be affecting the problem. The third step is to analyze the problem. This involves identifying the causes of the problem and the relationships between the different elements of the problem. The fourth step is to develop a solution. This involves identifying the different options available and evaluating the pros and cons of each option. The fifth step is to implement the solution. This involves putting the solution into action and monitoring the results. The sixth step is to evaluate the solution. This involves comparing the results of the solution with the desired state or goal and determining whether the solution has been successful.
